(a) 同步候选运动交互

两艇的推进器融合候选

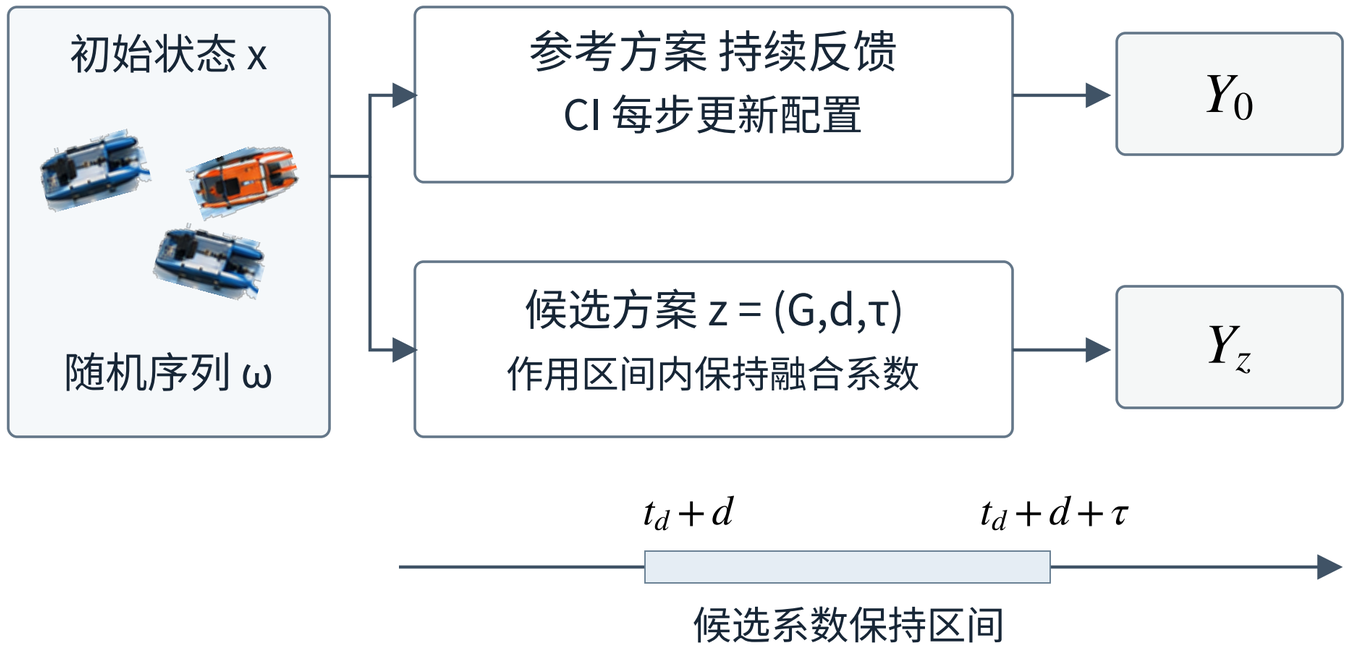

源动作随各自预测观测更新

$$d_{ij}^{k\ell} = \min_q \|\hat{p}_i^k(s_q) - \hat{p}_j^\ell(s_q)\|$$

$$\psi_{ij} = [r_s - d_{ij}^{k\ell}]_+^2$$

(b) 相同初始状态下的配对闭环

$$\Delta = P(0 \to 1 | x, z) - P(1 \to 0 | x, z)$$
